

Xotic Odds Converter

Problem the App Solves

Xotic Odds Converter (XOC) helps sports bettors quickly understand the probability of American betting odds and estimate the likelihood of a one-leg or two-leg parlay, the two parlays statistically proven to hit most.

Who the App is Designed For

This Application is designed for sport bettors and sport fans who want a simple tool to elevate betting odds before placing wagers

Screen 1 – Home Screen

The home screen gives you an intriguing Xotic brand screen and provides a clean entry point into the application. Just with one click hit the “Tap to Start” button.

Screen 2 – Input Screen

The Input Screen allows users to enter one or two sets of American betting odds. After entering their odds, users can press the Calculate button to generate implied probabilities and overall parlay probability.

Screen 3 – Results Screen

The Results Screen displays:

- Leg 1 implied probability
- Leg 2 implied probability
- Overall parlay probability
- Risk level (Low, Medium, or High)

Users can then return to the Home Screen using the Back button.
